Street-connected and homeless children often have no safe alternatives to public spaces.

Join us as we stand with them and demand that governments ensure their safety and protection.

1. **Safe Spaces for Self-Isolation**

   Provide shelter and alternative accommodation during lockdowns and curfews, and do not punish street-connected children and homeless youth who have nowhere else to go.

2. **Access to Essential Services**

   Governments must provide food, water, healthcare and sanitation to all street-connected children and homeless youth, and allow social workers to continue street outreach during lockdowns.

3. **Access to Information**

   Make sure that street-connected children and homeless youth have access to information that they can easily understand, on how to stay safe and where they can go when they need support.

Safety and protection for street children starts here.
